## Summary

---

A computer science major seeking a lively work experience that will further optimize my skills and knowledge through learning and participating in a rigorous and fulfilling role.

## Education

---

De Anza Community College	2018-2020
San Francisco State University	2020-2022
• Bachelor's of Science, Computer Science	

## Coursework

---

Object-Oriented Design and Programming	Data Structure and Algorithm
Programming Methodology	Operating Systems
Machine Structures	Intro to Web Development

## Skills

---

Programming Languages: Swift, Python, Java, SQL, HTML, CSS, Javascript, C/C++  
Tools: Git, Xcode/VScode, MySQL, Firebase, Node, jQuery, Handlebars, React, Angular

## Projects

---

### Personal Portfolio Website

February 2021

- Created a webpage from scratch using the React/Bootstrap Library, HTML, and CSS
- Mainly focuses on Front End Design to showcase what I have accomplished

### PhotoApp Website

November 2020 - December 2020

- Web service that allows for multiple users to post pictures and comment
- Implements MySQL database to store user data and encrypt it
- Back End allows for users to log in and out of the web service

### Gem Art

August 2020 - November 2020

- IOS application that displays stickers created by Gem Art
- Search bar to filter what users are looking for
- Read from CSV file to gather data to input into the program

### Tapper

July 2020

- IOS application where UI takes user input and modifies the user interface
  - Implements a counter algorithm to end the game as soon as the user reaches the limit they set
-
